

*"Learn to Care"
Learning System*

Dear Educator:

Welcome to the new exciting range of flipchart and resource packs from Vincent Hyland Learning. Each lesson is designed to fully engage the classroom in a learning experience that is both visually and audibly challenging and participative. For ease of use, an in-depth instructional support throughout the resource is provided. New features within each flipchart will engage the mind while serving cross-curricular requirements. With Science and especially living things, geography, history and much more you will find ideas to enhance your students learning needs in a visually stunning and interactively engaging environment.

These new cross curricular Science lessons cover Living things, Plants and Animals, Environmental Awareness, Science and the Environment and Caring for the Environment. These premium resources using audio, video and interactive lessons are aligned to the National Primary Social, Environmental and Scientific Education (SESE) Curriculum and are aimed at grades 4-6 (9 to 12 year old).

The National Science Standards addressed in each lesson are :

- 1) Living things - One example of the wide variety of living organisms in the local and wider environment
- 2) The life process, including nutrition, movement, growth and reproduction common to animals, including humans.
- 3) Sharing of life processes between living things
- 4) Variation between same species with emphasis on differentiation
- 5) Variation in behaviors between same species
- 6) More detailed study of individual animals including identification of parts

Each resource is packed with video, photography, audio, the written word, mind challenges, quizzes and puzzles and can be taught as a whole approach or divided into sections. The choice is yours. With a logical step by step approach, children will be challenged right from the beginning. Whether it is being introduced to new vocabulary, facts about the chosen subject matter, or immersion into the lives of the animals portrayed, with each resource children can collaborate in their learning environment.

I hope you enjoy the journey as much as I have!
